WORK EXPERIENCE

Software Engineering Intern| Java , Springboot , MySQL   **06 2023 - 07/2023**
Frog CellSat Limited , Noida (UP)

- Engaged in learning and implementing socket programming in Java to facilitate seamless communication with third-party devices, particularly repeaters.
- Developing robust solutions that enable data transmission and reception, ensuring smooth communication with repeaters and other similar devices.
- Developing strategies and implementing scalable architectures that allow our software systems to handle a growing number of connections without compromising performance or stability.
- Monitoring and Controlling these connections remotely using our software product .

PROJECTS

Shiksha Setu | HTML , CSS , JAVASCRIPT , PHP   **01 2023**
Developed a local charity donation website for our college club - ShikshaSetu aimed at facilitating and encouraging charitable contributions within the community. The objective of this project was to create an intuitive and user-friendly platform that connects donors with local charities, streamlining the process of making donations and increasing community engagement in philanthropic activities.

LoopSpace | MongoDB , Express , React , NodeJS   **09 2022**
Developed a strong communication and awareness social-webapp for our campus that would help a student establish connections with other students, create celebration posts, job-related posts so that nobody , club members can utilise the platform to reach maximum audience without having to physically distribute any upcoming events details .

OPEN SOURCE PROJECTS
