Little World School	**04 2004 – 06 2020**
*12th -***Percentage***– 89.2%*	*Jabalpur, INDIA*

PROJECTS

LoopSpace | MongoDB , Express , React , NodeJS   **11 2022**

The main idea behind it was to build a strong communication and awareness system among the students of the campus.

It is a Web-based system that allows its registered members to establish relationships with other members and to share different types of information that includes personal data, contacts, multimedia resources. They can share the job-related details posted by fellow mates via adding a post which can be read by all the students using the website, and hence everyone will be updated.

Feeding Jabalpur | HTML , CSS , Javascript   **07 2021**

Feeding Jabalpur is an initiative to support the poor people in slums residing in Jabalpur . Users can click photos of the slums near their residence and post it in the website's feed , the most relevant posts will get featured on our website. Users will have the option to donate for those slums hence contributing to a social-cause.

99reasonstolive| HTML , CSS , Javascript   **06 2021**

Website for a traveller combining passion for cooking, photography and promoting tourism describing his food & travel experience there .

OPEN SOURCE PROJECTS

Inkscape(Vector) | C++,UI/UX   **05 2021**

It is a professional quality vector graphics software similar to Adobe Illustrator . It's codebase is mainly written in

C++ & some part in python. 2 MRs Merged , worked on UI,UX.

KWOC | Python   **05 2021**

Contributed to a basic operating system mock-up made from python GUI module tkinter.

HACKATHONS

SheHacks2021 | HTML , CSS , JS   **05 2021**

Built a website CODEFLIX : one stop solution for all the tech enthusiasts, from information about various technical opportunities, to resources, to podcasts, to memes and tech humour.
